Fuel tank	30L
Hydraulic oil tank	40L
Brakes	Optional
Wheel chocks	Standard on unbraked units
Spare wheel	Standard
Length	Working 3260mm or folded for transport 2995mm
Width	1270mm
Height	2340mm (Discharge chute can be removed easily to reduce height)
Weight	Under 750kg

The Arborist 13-23 Range

The Arborist 13-23 encompasses all of the main features that you would expect from today's professional wood chippers.

With optional single or twin feed Rollers linked to a no-stress in-feed control system, the 13-23 can handle wood waste up to 130mm with ease and with the added benefit of the letterbox opening the operator can process wide branches with limited reduction.

With the option of two engines, a 22hp Petrol or a 20hp Diesel, 13-23 range allows you to find the appropriate machine to match the job and budget without sacrificing specification or quality.

Using a fully fabricated flywheel with two bearings that can be greased and the proven disc blade system, the 13-23 will reduce your wood and green waste reliably saving you time and money.
